

DAREBIN CREEK MANAGEMENT PLAN

Melway Reference 182 C10

Epping, Victoria

Collie produced a Masterplan for a creek-side area of Epping identified as having potential to be a district recreational facility. Work included reviews of the site and of previous studies, liaison with Melbourne Water, community consultation in the form of workshops, questionnaire and displays and the production of computer based plans and a report. Collie also managed sub consultants to advise on landscape management and revegetation issues. The final Masterplan includes extensive recommendations and a 10-year implementation programme with indicative costs.
