

JACKSONS HILL ACTIVITY CENTRE

Melway Reference

Sunbury Victoria Australia

Analysis and planning associated with the rezoning of land to facilitate a neighbourhood activity centre within an 1100-lot residential development in Sunbury, Victoria. The site was located at the intersection of two arterial roads near sub-regional open space and close to a variety of educational facilities. Site planning provided for approximately 1000 square metres of retail and commercial floor space as well as medical, child care, multi-unit residential and other land uses.

Collie has been involved in assisting with the detailed design of the site in preparation of a planning permit application. The proposal includes innovative sustainable design features and a mix of complementary land uses that aim to provide a high quality local activity centre.
